METAL WORKING

Tech Abrasive Supply Company has many customers in the metal working Industry. These are some of the most popular products used on thier applications.

RB 346 23 MX Belts

Designed for most general purpose appliations on ferrous & non-ferrous metals; including grinding on stationary grinding machines, deburing castings & grinding punched burr & flash, & smoothing weld seams.

High tear resistance, excellent grit adhesion. Available in a wide range of sizes.

Grit Range: 24, 36-320, 400

Hermes Abrasives

Premier Red Flap Discs

Ideal for metal grinding or polishing, especially for weld bead grinding on fine carbon and stainless steel. Allows you to simultaneously grind and finish without switching tools.

Available in 4 1/2", 5", 7" Discs

Grit Range: 36 - 120

Carborundum Abrasives

RB 314x Fibre Discs

Designed to use on all metal grinding applications requiring heavy stock removal, fast cutting action & high resistance to heat & edge tearing. Excellent for fast weld removal and for blending & finishing welded assemblies.

Available in 4 1/2", 5", 7" & 9 1/8" Discs

Grit Range: 16, 24, 36-120

Hermes Abrasives

Band Saw Blades

Available in a variety of widths and lengths.

Choose tooth patterns to accomodate the

metal, or other composites you may be sawing.

Carbide tip blades are also available. Our most

popular band saw blade among metal

customers is the Epic Blade. Perfect

for cutting stainless steel.

Simonds International

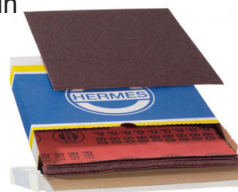

RB346 J Flex Sheets

Designed for the grinding & sanding of brass, tool steel, zinc castings, aluminum alloys & stainless steel. This cloth backed sheet offers a high strength bonding system that prevents premature abrasive grain shedding and it is highly flexible for adaptability to contoured work spaces & radii.

Grit Range: 40- 400, 600

Hermes Abrasives

EZ View Discs

Strategically placed holes allow the operator to see the

surface area being ground while the disc is spinning;

allowing for faster, more accurate work with a superior

finish. Ideal for heavy duty grinding of welds,

gates, risers & parting lines on castings &

carbon steels. Best choice for stainless.

Available in 4 1/2" & 5"

Grit Range: 24-80

Carborundum Abrasives

Sandlight Pads

Non woven synthetic 6" x 9" fiber hand pads. For use in wet or dry applications & available in a variety of grades for everything from heavy duty sanding to polishing applications. Reusable and long lasting.

Grades: Light Duty, Ultra Fine, Stripper, Stainless, General Purpose, & Heavy Duty.

Handle available for uniform finish.

Also available in discs.

United Abrasives

Cut Off Wheels

Our options in Cut Off Wheels include Metal Cutting

Carbide Blades, Ultimate Ceramic Cut off Wheels,

General Purpose Aluminum Oxide,

Diamond Cut Off Wheels for

stationary or portable saws.

Available up to 16"

United Abrasives & Allison Abrasives

VC 151 Longlife Velour Discs

Designed for metal & woodworking applications. A highly flexible tear resistant disc for intermediate & finish sanding on soft or hard woods, automotive primer, aluminum, composite plastic & fiberglass moldings.

Available in 5" & 6" Discs
Grit Range: 60-240, 320-500
Hermes Abrasives

Wire Brushes

We offer wire brushes in a variety of configurations including the most popular cup, circular and wheel. Manufactured with crimped stainless wire, they offer high flexibility for easy cleanup of welds & flux removal. Stiffer twisted wire brushes are also available for superior rust removal.

United Abrasives

Premier Red Quick Change Discs

Self sharpening Zirconia Alumina quick change discs allow for a cooler cut & longer life when working on stainless steel & other hard to grind metals.

3 systems available:

TS - turn on/off style fastener

TR - roll on/off fastener

TP - snap on/off system for faster changes, reducing down time.

Carborundum

Metal Working Lubricants & Coolant

A full suite of Metalworking Oils, Coolants, Rust Preventatives and Cleaners. We can get products catered specifically to your application, whether it's working with Steel, Aluminum, Stainless or Ceramics.

Fuchs & Angler

Grinding Bench Wheels -

Aluminum Oxide Grain General Purpose Bench Wheels for sharpening tools and light stock removal. Great for ferrous metals including carbon steel, steel, iron, forgings, etc. Available in 6", 7", 8", 10" & 12" Diameters.

Grit Range: 24-80*

*Grit availability based on diameter.

United Abrasives

EZ Touch Abrasive Contour Sponges-

For hand sanding & uniform finishing of metal, fiber glass, composites, woods, solid surfaces, & primed, stained sealed or painted surfaces. Superior flexibility. Can be used wet or dry. Ideal for flat, curved, contoured & hard to reach areas.

Grit Range: Medium - Micro Fine

Carborundum Abrasives

We have many options available to you. If these don't suit your needs let us know what you are looking for and we will find the best options for your business.

Call or E-Mail us for pricing, quotes or information. Samples may be available upon request.
